

## Garden Plant Assortment 2018-2019

### Did you know that:

Seed germination of ABZ strawberry F1 hybrids is now 90%+

ABZ Strawberry F1 hybrids are large fruited varieties of the species *Fragaria x ananassa*. All varieties are day-neutral and propagated by seed.

Plant will bloom and bear fruit within 3 - 5 months from sowing.

Fruit production will continue during whole summer into Autumn.

One plant may produce 700 - 1500 grams of fruit during whole season.

ABZ strawberries have a sweet and delicate flavour.

ABZ strawberry seeds are to be stored cool and used within one year.

ABZ strawberry F1 hybrid varieties are protected by PVP.
