

Strawberry F1 Summer Breeze Rose

Our Double Flower Series

Strawberry Summer Breeze Rose is the new sensation in ornamental strawberries. The rose-like double flowers are real eye-catchers. This double type of flowers keep their colour for a considerable longer period than the single types. The combination of abundant colour and fresh summer fruit will give consumer the fresh feeling of a Summer Breeze!

Plug production

Seeds of Summer Breeze Rose germinate fast and uniform. In 6-7 weeks seedlings develop into strong plug plants.

Culture to finished product

Strawberry Summer Breeze Rose develops a compact, multicrown plant with very few runners. The double flowers appear 5 to 9 weeks after transplanting. For more details of production time, please see our production schedule. **Shelf life** of double flowers is a considerable improvement over single flowers. This means much more flower colour on point of sale.

Flower Colours and Availability

The flower colour deep rose is fully commercially available. In years to come other flower colours to be followed.

Advices for cultural practice

Information provided by ABZ Seeds, in any form whatsoever, is without commitment. The buyer itself must determine whether the goods and information are suitable for the intended growth and/or can be used in the local conditions.
