

Assortment 2019-2020

Fresh Market Growers

Did you know that:

ABZ has now in the market a full assortment of ever bearer gourmet strawberries, which produces fruit year-round.

Seed germination of ABZ strawberry F1 hybrids is now 90%+

ABZ Strawberry F1 hybrids are large fruited varieties of the species *Fragaria x ananassa*. All varieties are day-neutral and propagated by seed.

Plants from seed can be propagated in a sustainable way and should be a clean start for fruit production.

Plants will bloom and bear fruit within 3 - 5 months from sowing.

One plant may produce 700 - 2000 grams of fruit during whole season.

ABZ strawberries have a sweet and delicate flavour.

ABZ strawberry seeds are to be stored cool and used within one year.

ABZ strawberry F1 hybrid varieties are protected by PVP.
